Corrigendum: Masticatory Performance Measured with a Chewing Gum Containing Spherical Resinous Micro-particles

Toshiya Kanazawa, Takashi Zaitsu, Masayuki Ueno, Yoko Kawaguchi

Department of Oral Health Promotion, Tokyo Medical and Dental University, Tokyo, Japan

In the original version of this article contained some mistakes. In this Corrigendum, these mistakes are corrected.

1. In the second paragraph of ‘1. Study participant’ (Materials and Methods section; p. 257), there was an error about expression of IRB approval. Correction is as follows (the corrected context is displayed in bold): “This study protocol was approved by the Ethical Review Board of Tokyo Medical and Dental University (No. D2014-139-01).”

2. In the second paragraph of ‘3. Objective masticatory performance’ (Materials and Methods section; p. 257), replace the inequality sign (>) with a phrase. The corrected sentence is reproduced here (the corrected context is displayed in bold).

The particles in the chewing gum were crushed into small pieces when pressed under a weight of more than 50 g.

3. In the first paragraph of Discussion section (p. 261), there was an error in the unit. Modify the sentence as follows (the corrected context is displayed in bold). The diameter of the particles was determined to assume that teeth move approximately 10 μm during mastication.

We apologize for our mistake and any inconvenience this may have caused.
